

# CN05, CN10 SERIES

## NON-SPRING RETURN DIRECT-COUPLED DAMPER ACTUATORS FOR FLOATING AND TWO-POSITION CONTROL

### PRODUCT DATA

### GENERAL

This non-spring return direct-coupled damper actuator provides floating and two-position control for:

- air dampers,
- VAV units,
- air handlers,
- ventilation flaps,
- louvers, and
- reliable control for air damper applications with up to 10 sq ft / 44 lb-in. (5 Nm) and 20 sq ft / 88 lb-in. (10 Nm) (seal- less damper blades; air friction-dependent).

### FEATURES

- **Declutch for manual adjustment**
- **Adjustable mechanical end limits**
- **Removable access cover for direct wiring**
- **Mountable in any orientation**
- **Rotation direction and service/OFF switch**

### SPECIFICATIONS

#### Supply voltage

CN6105/CN6110	24 Vac/dc -15%/+20%, 50/60 Hz
CN4605/CN4610	230 Vac -15%/+20%, 50/60 Hz

#### Nominal voltage

CN6105/CN6110	24 Vac/dc, 50/60 Hz
CN4605/CN4610	230Vac, 50/60 Hz

**All values stated hereinafter apply to operation under nominal voltage conditions.**

#### Power consumption

CN6105/CN6110	5 VA / 2 W
CN4605	22 VA / 2 W at 50 Hz
CN4610	25 VA / 2 W at 60 Hz

#### Ambient limits

Ambient operating limits	-5...+140 °F (20...+60 °C)
Ambient storage limits	-22...+176 °F (-30...+80 °C)
Relative humidity	5...95%, non-condensing

#### Safety

Protection standard	IP54
Protection class	II as per EN 60730-1
Overvoltage category	II

#### Lifetime

Full strokes	60000
Repositions	1.5 million

#### Mounting

Round damper shaft	3/8 in...5/8 in.
Square damper shaft	1/4 in...1/2 in.; 45° steps
Shaft length	min. 1-5/8 in.

#### End switches (when included)

Rating	Class II
Triggering points	5° / 85°
<b>Torque rating</b>	44 lb-in. (5Nm) / 88 lb-in. (10 Nm)

#### Runtime for 90°

CN6105	90 sec (dc / 60 Hz ac)
CN6110	90 sec (dc / 50 Hz ac)
CN4605	65...110 s (60/50 Hz)
CN4610	65...140 s (60/50 Hz)

#### Rotation stroke

95° ± 3°

#### Dimensions

see "Dimensions" on page 6

#### Weight (without cables)

1 lbs.

#### Noise rating

35 dB(A) max. at 1 m  
40 dB(A) for 230 Vac at  
65 sec runtime

#### Certification

CN6105/CN6110	CE & UL
CN4605/CN4610	CE

## PRODUCT IDENTIFICATION SYSTEM

<b>C-Electrical Motor</b>
<b>N-Fail Safe Function (Non-Spring Return)</b>
61-24V Floating Control + ON/OFF
75-24V Modulating Control + Floating + ON/OFF
46-230V ON/OFF
05-44 lb-in. (5 Nm)
10-88 lb-in. (10 Nm)
<b>A-Standard Model</b>
1-No Feedback
2-Voltage Feedback Signal
0-No Internal Auxiliary Switches
2-Two Internal Auxiliary Switches
XX-System Controlled Numbers

C N 75 10 A 2 0 XX

Model	Description
CN6105A1011	5Nm, 24Vac/Vdc, floating control, non-spring return, no feedback and without aux. Switch
<b>CN4605A1001</b>	<b>5Nm, 230Vac, floating control, non-spring return, no feedback and without aux. Switch</b>
CN6110A1003	10Nm, 24Vac/Vdc, floating control, non-spring return, no feedback and without aux. Switch
CN6110A1201	10Nm, 24Vac/Vdc, floating control, non-spring return, no feedback and with aux. Switch
CN4610A1001	10Nm, 230Vac, floating control, non-spring return, no feedback and without aux. Switch

## BASIC FEATURES

Fig. 1. Setting units and control elements

### Legend for Fig. 1:

- 1) Universal shaft adapter
- 2) Mechanical end limits (manually adjustable)
- 3) Declutch button
- 4) Function selection switch
- 5) Removable access cover
- 6) Anti-rotation bracket

## Contents of Package

The delivery package includes the actuator, parts 1 through 6 (see Fig. 1), plus two cable grommets and a spare cable grommet.

## RUN MODES

The function selection switch (see Fig. 2) can be used to place the actuator into any one of two different modes:

- Service/Off; or
- the floating/2-position run mode (“Dir” for CCW-closing dampers or “Rev” for CW-closing dampers).

Fig. 2. Function selection switch

## Power-Off Behavior

If power is removed, the shaft adapter remains in position.

## Service/Off

If the function selection switch is set to the “Service/Off” position, then all rotary movement is cancelled, and all control signals are ignored, thus allowing the actuator to be manually operated safely.

### Floating/2-Position Run Mode

If the function selection switch has been set to one of the two floating/2-position control settings—and if the actuator is wired correspondingly (see Fig. 7, Fig. 8, and Fig. 9)—then as soon as operating power is applied, the shaft adapter will run according to the control signals applied.

Table 1 describes the behavior (“stops,” rotates “CCW,” or rotates “CW”) of the CN6105/CN6110 in dependence upon the control signals (switch “open” or “24 Vac/dc”) applied to terminals 3 and 4, the function selection switch setting, and the manner in which the actuator is wired (either for floating mode: see Fig. 7; or for 2-position mode: see Fig. 8).

**Table 1. Behavior of CN6105/CN6110**

wiring	control signal at		switch setting		
	term 3	term 4	Dir	Service/ Off	Rev
float.	open	open	stops	stops	stops
	open	24Vac/dc	CCW	stops	CW
	24Vac/dc	open	CW	stops	CCW
2-pos.	24Vac/dc	open	CW	stops	CCW
	24Vac/dc	24Vac/dc	CCW	stops	CW

Table 2 describes the behavior (“stops,” rotates “CCW,” or rotates “CW”) of the CN4605/CN4610 in dependence upon the control signals (switch “open” or “230 Vac”) applied to terminals 1 and 3 and the function selection switch setting: only one manner of wiring is permitted (see Fig. 9).

**Table 2. Behavior of CN4605/CN4610**

control signal at		switch setting		
term 1	term 3	Dir	Service/ Off	Rev
open	open	stops	stops	stops
open	230 Vac	stops	stops	stops
230 Vac	open	CW	stops	CCW
230 Vac	230 Vac	CCW	stops	CW

## MANUAL ADJUSTMENT

### IMPORTANT

**To prevent equipment damage, before manual adjustment, you must remove power or set the function selection switch to the “Service/Off” position.**

After removing power or setting the function selection switch to the “Service/Off” position, the gear train can be disengaged using the declutch button, permitting the shaft adapter to be manually rotated to any position.

### Limitation of Rotation Stroke

Two adjustable mechanical end limits are provided to limit the angle of rotation as desired (see Fig. 3). The mechanical end limits must be securely fastened in place.

**Fig.3. Mechanical end limits**

To ensure tight closing of the dampers, the shaft adapter has a total rotation stroke of 95°.

## INTERNAL END SWITCHES

The internal end switches “A” and “B” are changeover switches which are activated when the shaft adapter moves past a position of 5° and 85°, respectively (see also Table 5).

**Fig.4. Internal end switch triggering points**

## INSTALLATION

To avoid personal injury (electrical shock) and to prevent equipment damage, before installation, you must remove power.

These actuators are designed for single-point mounting.

### Mounting Instructions

All information and steps are included in the Installation Instructions supplied with each actuator.

### Mounting Position

The actuators can be mounted in any position (IP54 is dependent upon orientation; see Fig. 5). Choose a mounting position permitting easy access to cables and controls.

Fig. 5. Mounting for IP54

NOTE: Further, in order to guarantee IP54, only original Honeywell grommets may be used.

### Anti-Rotation Bracket and Screws

If the actuator is to be mounted directly on a damper shaft, use the anti-rotation bracket and screws included in the delivery package. The min. distance between the center of the damper shaft and the middle of the anti-rotation bracket is 3.35 in.; a max. of 4.25 in. is allowed (see also Fig 11).

Depending upon the specifics of your mounting site, the actuator may shift in position slightly while tightening the screws at the top of the shaft adapter. The anti-rotation bracket features a T-piece with a 5-mm-long shank to accommodate for this movement. It is important to ensure that this play is not impeded.

### Universal Shaft Adapter

The universal shaft adapter can be used for shafts of various diameters and shapes (round: 3/8...5/8 in. and square: 1/4...1/2 in.).

## WIRING

### CAUTION

To avoid personal injury (electrical shock) and to prevent equipment damage, before wiring, you must remove power.

### Access Cover

#### IMPORTANT

Once the access cover has been removed, please take care to avoid damaging any of the parts now accessible.

The access cover can be unscrewed and removed in order to gain access to the terminal block(s) and perform wiring.

Fig. 6. Access Cover

### Wiring Diagrams

Fig. 7. CN6105/CN6110 (floating mode)

CN05,CN10 SERIES DAMPER ACTUATORS FOR FLOATING/2-POSITON CONTROL

Fig. 9. CN4605/CN4610 (2-position mode)

Fig. 10. End switches

NOTE: Both internal end switches must be connected to the same power source.

Tables 3,4 and 5 summarize the information presented in the preceding wiring diagrams.

Table 3. Signals at terminals for CN6105/CN6110

terminal	signal in floating	signal in 2-pos. mode
2	common ~/-	common ~/-
3	24 V ~/+ (control signal)	24 V ~/+ (control/ power signal)
4	24 V ~/+ (control signal)	24 V ~/+ (control signal/power)

NOTE: All cables connected to these terminals must be equipped with spark suppression.

Table 4. Signals at terminals for CN4605/CN4610

terminal	signal
1	L (230 V ~)
2	N (230 V ~)
3	control signal

NOTE: All cables connected to these terminals must be equipped with spark suppression.

Table 5. Internal end switches (SSW2)

terminal	type of switch
S1	common lead for switches A and B
S2 / S3	change-over switch A (S1/S2 opens and S1/S3 closes when shaft adapter moves CW past 5°; reverts to original state when shaft adapter moves CCW past 5°).
S5 / S6	change-over switch B (S1/S5 opens and S1/S6 closes when shaft adapter moves CW past 85°; reverts to original state when shaft adapter moves CCW past 85°).
