## KLIMAGIEL HANGING SYSTEM WITH THREADED BAR:

It is possible to hang KLIMAGIEL steel ducts in easy way with the system supplied by us, hanging the duct every 2 meters and then assembling following next step (see pic. 1 and 2):

- Fix the clip (4) at both ends of the two ducts you have to hang;
- Hook the buttonhole (1) at the clip through the bolt (5);
- Tighten the bolt fastening the clip;
- Fix the duct at the threaded bar (2) (not supplied by us) in the wished position by screwing the M8 insert (3).

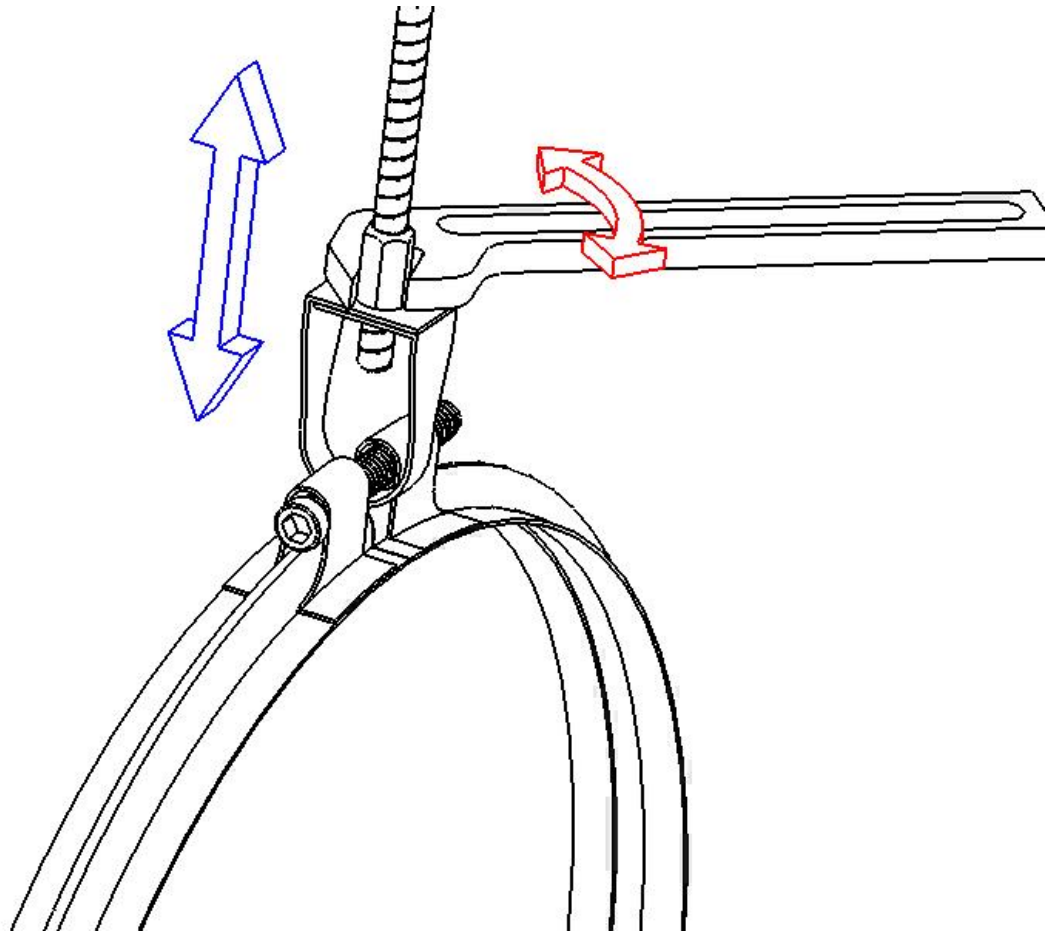

With our hanging system it's possible, by screwing or unscrewing the nut nr. 3, to change vertical duct position (see pic. 2).
